

Salt Business Launches Nationwide Internet and Fixed-Line Portfolio for Swiss Businesses

Salt Business launches Corporate Internet, a new nationwide corporate connectivity solution for companies in Switzerland. The offering delivers high-performance internet access with built-in business continuity and advanced security powered by Fortinet, while maintaining Salt's trademark excellent pricing.

The launch marks a strategic expansion of Salt Business's corporate offering, addressing growing demand for resilient and secure connectivity as business-critical infrastructure. Corporate Internet positions Salt Business as a full-service connectivity partner for companies across Switzerland. Available nationwide, the service is delivered over fiber-based networks and, where required, other fixed-line infrastructure. The offering is built around two core requirements: business continuity and security.

Business Continuity

Business continuity is a central pillar of Corporate Internet. Built-in resilience and automatic failover ensure operations continue even if the primary connection fails, switching immediately to the awarded Salt mobile network while maintaining stable performance. Business-critical applications such as video conferencing, cloud services, VPN access and remote work tools remain available, allowing operations to continue without interruption.

Security By Design with Fortinet

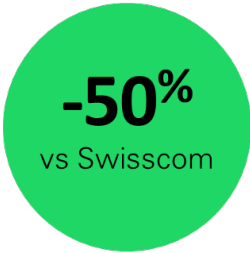

Security is built into Corporate Internet and forms an integral part of the service. Powered by Fortinet, a leading global cybersecurity provider, the solution protects networks, data and applications against modern threats. Built-in DDoS protection helps keep website available during large-scale attacks, while Anti-Malware protection detects and blocks malicious software before it can spread. Security functions are centrally managed and continuously updated, leveraging Fortinet's global presence to rapidly refresh threat databases and block new viruses quickly.

Corporate Voice

Alongside Corporate Internet, Salt Business also offers Corporate Voice, a carrier-grade voice solution compatible with existing on-site PBX systems or cloud-based telephony platforms. Flexible pricing models, including pay-as-you-go as well as Flat Swiss and Flat International plans, ensure predictable costs.

Availability & Pricing

Corporate Internet is available immediately nationwide across Switzerland in three symmetrical speed options: 1 Gbit/s from CHF 95.20 per month (excl. VAT), 10 Gbit/s from CHF 159.20 per month (excl. VAT), and an ultra-fast 40 Gbit/s option available on demand. With market-leading prices up to 50% lower than comparable offers, Corporate Internet reinforces Salt's commitment to unmatched value. Salt Business Mobile customers benefit from a 20% discount, while an early-bird offer provides a 50% rebate for the first six months. More information is available at www.salt.ch/business

Price comparison based on publicly available product information as of 27.01.2026, excluding VAT: **Salt:** Corporate Internet 10 Gbit/s, **Swisscom:** Business Internet Service L 10 Gbit/s

Max Nunziata, CEO of Salt, comments on the day of the product launch in Zurich: *"Our customers have trusted us for years as a mobile provider. With Corporate Internet, that trust now extends to business-critical connectivity, reflecting its growing strategic importance for companies. Connectivity moves to the centre of what we deliver, supported by built-in business continuity and advanced security. The launch follows extensive testing with customers, confirming the solution's relevance and reliability."*

Press release

About Salt

Salt stands for offering innovation and premium products at attractive prices in the Swiss telecommunications market. An outstanding mobile network (Connect, 2026), Switzerland's best broadband performance (Nperf 2025) and customer-centric service ensure an outstanding experience for its business and residential subscribers. The company's services, as well as its fixed and mobile networks, have received repeated awards: best universal provider for residential customers (Bilanz, 2025), outstanding mobile network (Connect, 2025), outstanding mobile hotline test (Connect 2025), very good mobile network (Chip), winner regional fixed-network providers with "outstanding" rating (Connect, 2024), and best broadband tariff (SIQT, 2024). Based in Prilly (VD), Salt has two additional offices in Biel and Zurich. The company employs more than 1,000 employees and serves approximately 1,800,000 postpaid mobile and around 300,000 broadband customers across Switzerland. Salt currently offers 99.9% population mobile coverage.
